NeoKnowledge

Put your organization's knowledge at your fingertips

Neoknowledge

Imagine a system where all your company information – **documents, excel sheets, processes, contracts, images, videos** and **more** – are collected in a single **virtual library**, and a **search engine based on Artificial Intelligence** that **finds the information you are looking for with a simple click**, transforming knowledge into a powerful tool to truly support your business.

> **Find all the marketing related invoices** 🔍

How does it work?

At the heart of our solution there is **natural language processing (NLP) and generative AI**. This allows the system to perform **deep searches through your knowledge base** and generate **precise and contextual answers.** Even the most hidden or hard-to-find information is now at your fingertips. Simply **provide the system with documentation** and you will have a chatbot that knows every detail of your company.

AI

Data management system

1. audio/video/images
2. documents/invoices/regulations
3. excel/word/pdf/report
4. unstructured data

An Intelligent Assistant Always at Your Disposal

Hello, I'm your smart search assisant

Suggested questions

give me my team's most recent reports

Find specific invoices or financial documents

Show step-by-step guide for approval of purchase requisitions and assist me in the procedure.

Look up the amount and balance date for invoice No. 456 from customer Y.

What do you want to search today?

Supports daily activities

The chatbot will be able to assist in daily tasks, finding and processing data and information.

Find all the answers you are looking for

Quickly find the right answer, even for the most complex questions.

Smart Tips

The system responds to questions and intelligently suggests new requests, improving brainstorming processes and operational efficiency.

The Power of AI at the service of your business

Smart Search Engine

Thanks to advanced AI technology, it is able to understand complex queries and return accurate and relevant results in seconds.
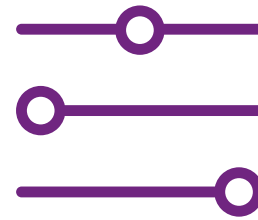

Dynamic Personalization

Each user has a unique profile that adapts over time based on usage, role, interests and needs. This makes the system's responses increasingly accurate and relevant.
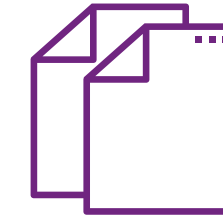

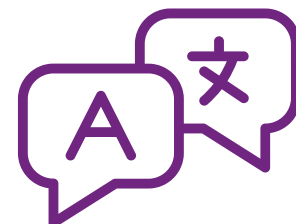

Multi-format Integration

It supports a wide range of file formats, including text documents, spreadsheets, presentations, images, videos, and audio.

Advanced Security

Our system guarantees complete protection of company data.

Multi-language support

Our AI can understand and interact in multiple languages, making the platform ideal for companies with international locations or multilingual teams.

Dedicated support

Our team is available to support and customize the service based on the needs of your organization.

Flexible system for different business needs

ADMINISTRATION

Quickly access invoices, accounting documents, simplifying management and speeding up bureaucratic procedures.
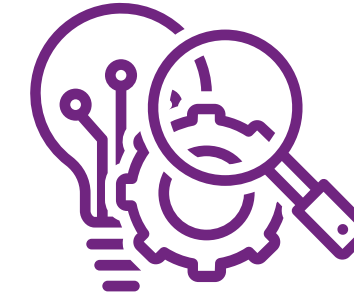

MANAGEMENT

Monitor emerging issues in your company and make strategic decisions based on clear data and information.

MARKETING AND SALES

Analyze market data, pricing, manage campaigns and easily collaborate with teams, accessing reports and presentations.

RESEARCH AND DEVELOPMENT

Find technical information, share results accelerating innovation, consult all R&D studies in a few moments.
